ACADEMIC DETAILS

B.E., COMPUTER SCIENCE AND DESIGN 85.2%

Kongu Engineering College, Erode | 2027

CLASS XII 89.33 %

Tamil Nadu Board of Secondary Education (DG) |
BHARATHI MATRIC HIGHER SECONDARY SCHOOL | 2023

CLASS X

Tamil Nadu Board of Secondary Education (DG) |
BHARATHI MATRIC HIGHER SECONDARY SCHOOL | 2021 100 %

PROJECTS

Secure Finance

github.com/react-native-chatbasedfinanceapp

Secure Finance is a chat-based personal finance mobile application developed using React Native, Express.js, and MongoDB. The application helps users manage expenses, track financial activities, and monitor spending through an interactive conversational interface. It provides a simple and user-friendly experience for maintaining personal financial records and improving budgeting habits.

PlaceHub

<https://github.com/roohithbala/placement>

PlaceHub is a placement preparation platform developed using React.js, Express.js, and MongoDB that connects students with mentors, interview experiences, coding resources, and career guidance materials. The platform helps students improve their technical skills, gain interview insights, and enhance placement readiness through shared learning and mentorship support.

Consultancy Project – Zain Fabrics

<https://github.com/roohithbala/consultancy>

Developed a web-based platform for Zain Fabrics to enhance product showcasing and business management. Worked on frontend development, backend integration, and database management to build a responsive and user-friendly application for handling fabric products, customer interactions, and business operations efficiently.

AI Bug Tracker

<https://github.com/roohithbala/ai-bug-tracker>

Developed an AI-powered bug tracking system using Python, Flask, React.js, Google Gemini AI, and SQLite that analyzes application error logs and provides AI-generated fix recommendations. The system helps developers quickly identify, debug, and resolve software issues through intelligent log analysis and automated suggestions

AI Project Idea Generator

https://github.com/roohithbala/freelancers_hackathon

Developed an AI-powered project idea generator using React.js, Express.js and Google Gemini AI that generates innovative software and application ideas based on user interests and domains. The platform provides project concepts, technology stack recommendations, and feature suggestions for students and developers, with a focus on usability and intelligent content generation.

MEMBERSHIPS

Executive Member –
Freelancing Club – Kongu
Engineering College

Aug 2025 - Apr 2026

Executive Member –
Computer Science & Design
Coding Club – Kongu
Engineering College

Aug 2024 - Mar 2026

ACHIEVEMENT

Hawk Eye Coding Event

First Prize

Code Fest Inter-Department Coding Event

Second Prize

Envias Inter-College Coding Event

Third Prize

COURSES

Data Structures and
Algorithms
Web Technologies
Object Oriented Programming
Database Management
Systems
Python Programming
Operating Systems
Devops
C Programming
Python
Web Development
Java Database Connectivity
(JDSC)
React.js
Spring Framework

CERTIFICATIONS

Oracle Certified
Professional: Java SE
17 Developer
Oracle

MongoDB Associate
Developer
MongoDB.
